dip drastically

● **KIDNEY PROBLEMS:** Ozempic has the potential to impair kidney function. People with known underlying renal disease, such as acute kidney injury or chronic renal failure, are at a higher risk of this happening.

● **ALLERGIC REACTIONS:** Ozempic hypersensitivity reactions occur in a small number of people. Swelling of the eyes, face, throat, tongue or lips; difficulty breathing or swallowing; severe rash or itching; dizziness or fainting; and very rapid heartbeat are all symptoms of a serious allergic reaction.

● **MENTAL HEALTH:** Using Ozempic injections for weight loss can lead to mental health issues.
